Average Energy Prices, San Francisco-Oakland-Hayward – October 2019

Gasoline prices averaged \$4.101 a gallon in the San Francisco-Oakland-Hayward area in October 2019, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Richard Holden noted that area gasoline prices were higher than last October when they averaged \$3.911 per gallon. San Francisco area households paid an average of 22.3 cents per kilowatt hour (kWh) of electricity in October 2019, higher than the 21.4 cents per kWh paid in October 2018. The average cost of utility (piped) gas at \$1.574 per therm in October was higher than the \$1.415 per therm spent last year. (Data in this release are not seasonally adjusted; accordingly, over-the-year-analysis is used throughout.)

At \$4.101 a gallon, San Francisco area consumers paid 49.6 percent more than the \$2.741 national average in October 2019. A year earlier, consumers in the San Francisco area paid 32.8 percent more than the national average for a gallon of gasoline. The local price of a gallon of gasoline has ranged from 21.2 to 49.6 percent above the national average in the month of October during the past five years. (See [chart 1.](#))

Chart 1. Average prices for gasoline, San Francisco-Oakland-Hayward and the United States, 2015-2019 (as of October)

Per gallon

SOURCE: U.S. Bureau of Labor Statistics.

The 22.3 cents per kWh San Francisco households paid for electricity in October 2019 was 64.0 percent more than the nationwide average of 13.6 cents per kWh. Last October, electricity costs were 57.4 percent higher in San Francisco compared to the nation. In each of the past five years, prices paid by San Francisco area consumers for electricity exceeded the U.S. average by at least 50.0 percent in the month of October. (See [chart 2.](#))

Prices paid by San Francisco area consumers for utility (piped) gas, commonly referred to as natural gas, were \$1.574 per therm, or 51.2 percent above the national average in October 2019 (\$1.041 per therm). A year earlier, area consumers paid 38.3 percent more per therm for natural gas compared to the nation. In the past five years, the per therm cost for natural gas in October in the San Francisco area has varied between 38.3 percent and 77.5 percent above the U.S. average. (See [chart 3.](#))

The San Francisco-Oakland-Hayward, Calif. metropolitan area consists of Alameda, Contra Costa, Marin, San Francisco, and San Mateo Counties in California.

Technical Note

Average prices are estimated from Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, 9 divisions, 2 population size classes, 8 region/size-class cross-classifications, and the 23 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm, are published. For gasoline, the average price per gallon is published. Average prices for commonly available grades of gasoline are published as well as the average price across all grades.

All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour represents the total bill divided by the kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.
